STRUCTURE DOCUMENT · NOT A VISUAL MOCK-UP

ELV Hub Middle East

Website Hierarchy, Section Wireframes & Visitor Journey Plan

Black-and-white structural blueprint prepared for client review and priority alignment — before visual design and content writing.

What this document is
A complete site skeleton: page index, every section's purpose, call-to-action destinations, and recommended visitor journeys. It is intentionally without colours, banners, copy, or finished layout. Visual design and wording come only after this structure is approved.

PREPARED FOR
Abdulsalam / ELV Hub Middle East

PREPARED BY
Project design lead (structure phase)

DOCUMENT TYPE
Hierarchy + Block Wireframe + Journey Map

VERSION
1.0 — Draft for review

REFERENCES STUDIED
elv-hub.com · AVI-SPL · SMERK · Granteq · Draft: elvhub.appointics.com

NEXT STEP AFTER APPROVAL
Visual design concepts → Development

Contents

1. Document purpose & working method
2. What we heard in the meeting (requirements extracted)
3. Who visits & what they need (personas)
4. Recommended visitor journey (homepage scroll path)
5. Full site map / hierarchy (all pages)
6. Global navigation & header options
7. Homepage section wireframes (with priority options A / B / C)
8. Inner page wireframes (Solutions hub + each solution + Projects + About + Contact)
9. Call-to-action (CTA) map — every button destination
10. Design-system notes deferred (recorded, not decided here)
11. Open decisions checklist for client
12. Proposed next steps after this review

1. Document purpose & working method

This document answers the request raised in the client call: **agree the skeleton before building the house**. We are not proposing colours, banner sizes, final wording, or a live mock-up at this stage.

AGREED SEQUENCE OF WORK

1. **Structure** — hierarchy, sections, journey, CTAs (this document)
2. **Priorities** — client selects section order and options
3. **Visual design** — black/white layout concepts → then brand colours
4. **Content** — final wording, photography / compressed hero video
5. **Development** — build the approved structure into the live site

Note: The existing developed draft at elvhub.appointics.com remains a temporary reference only. It is not the approved structure. Layout decisions in that draft do not lock priorities.

2. What we heard in the meeting (requirements extracted)

These points are structural or journey-related. Visual polish items are logged in Section 10 for later.

THEME	CLIENT REQUIREMENT (PARAPHRASED)	IMPACT ON STRUCTURE
Process	Do not rush into a live mock-up. First deliver hierarchy / block diagram / visitor journey. Agree skeleton, then design, then build.	This document exists
Visitor-first thinking	Design for a customer who arrives, checks solutions, judges credibility, then inquires — not for internal org chart navigation.	Journey-led homepage
Message speed	Like current elv-hub.com: say what you do in the first 1–2 sentences. Then show solution icons (less text). Then deeper solution cards with images + Read more.	Homepage H1 → Icons → Detail cards
Credibility early	Reference SMERK: “Trusted by” / client logos as an early impression (priority can be adjusted).	Partners / clients block near top
Navigation	No need for “Home” in the menu. “About Us” as primary nav feels legacy. Prefer Solutions-led nav. Remove search. Prefer “Contact Us” over cluttered top utility bar (bar kept as optional).	Nav redesign options
Header	Like AVI-SPL: transparent header over hero; becomes solid on scroll. Current white bar feels too tall / wastes space. Nav labels should use available width (larger).	Header behaviour options
Tone of surface	Too much pure white is hard on the eyes. Prefer softer, logo-aligned light blue tones later — not decided in this doc.	Logged for design phase

THEME	CLIENT REQUIREMENT (PARAPHRASED)	IMPACT ON STRUCTURE
Hero media	Control-room / high-tech atmosphere; short compressed video preferred; replaceable mock footage OK for now.	Hero media placeholder only

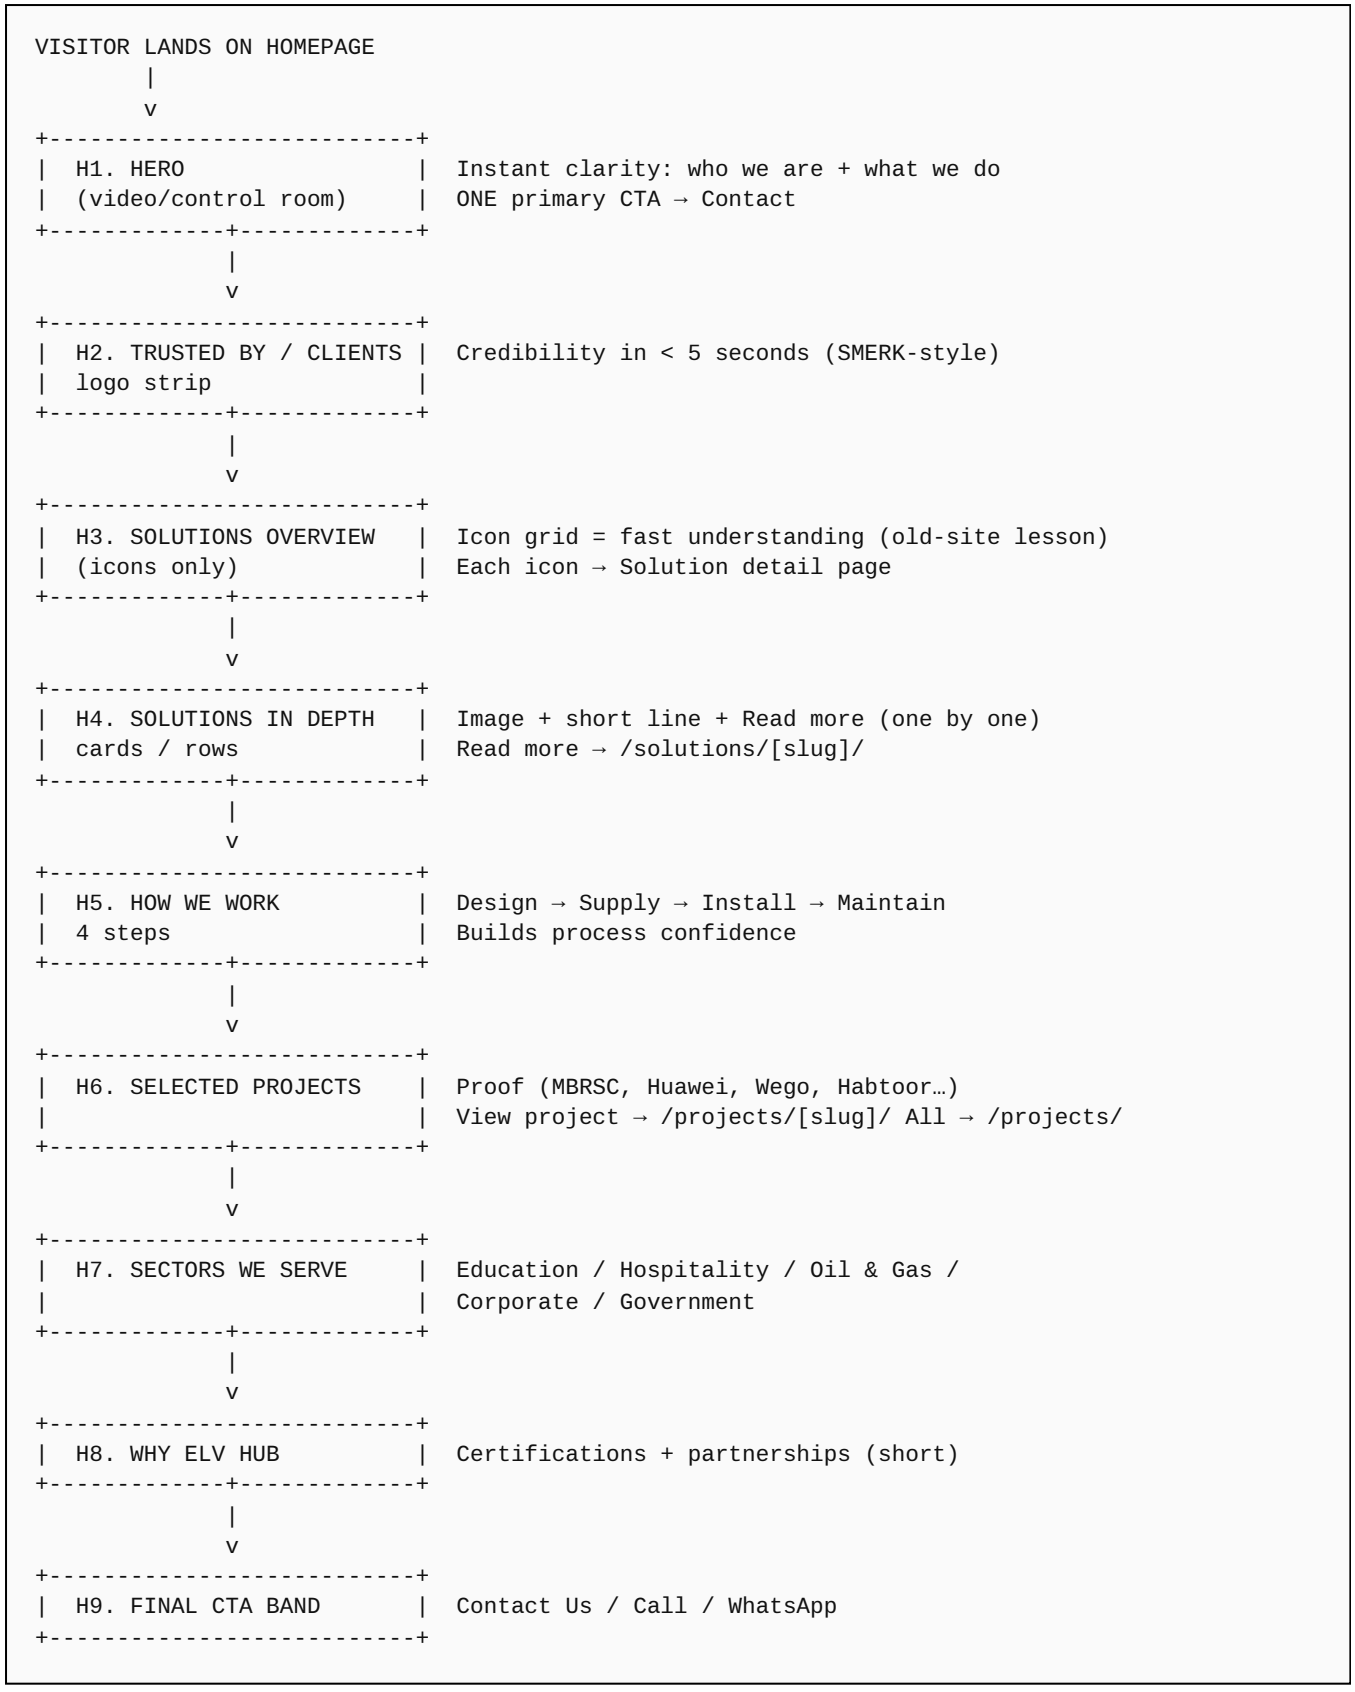

3. Who visits & what they need

Structure is built around three primary visitor types. Secondary audiences (job seekers, vendors) are not homepage priorities.

VISITOR	WHAT THEY NEED IN FIRST 30 SECONDS	PRIMARY PATH	SUCCESS CTA
Facilities / IT decision maker (corporate, hotel, campus)	“Do they do what I need?” + “Have they done this for people like me?”	Hero → Solution icons → Solution detail → Projects → Contact	Contact Us / Request consultation
Consultant / architect / main contractor	Scope coverage, certifications, delivery method (design–supply–install–maintain)	Hero → How we work → Solutions → About certifications → Contact	Contact Us
Existing client / AMC inquiry	Fast access to phone / WhatsApp / support path	Header Contact / Contact page	Call / WhatsApp / Form

4. Recommended visitor journey (homepage scroll path)

Below is the **recommended default journey** (Option A). Options B and C swap block order so the client can set priorities without changing page inventory.

VISITOR LANDS ON HOMEPAGE
H1. HERO (video/control room)
Instant clarity: who we are + what we do
ONE primary CTA → Contact
H2. TRUSTED BY / CLIENTS logo strip
Credibility in < 5 seconds (SMERK-style)
H3. SOLUTIONS OVERVIEW (icons only)
Icon grid = fast understanding (old-site lesson)
Each icon → Solution detail page
H4. SOLUTIONS IN DEPTH cards / rows
Image + short line + Read more (one by one)
Read more → /solutions/[slug]/
H5. HOW WE WORK 4 steps
Design → Supply → Install → Maintain
Builds process confidence
H6. SELECTED PROJECTS
Proof (MBRSC, Huawei, Wego, Habtoor…)
View project → /projects/[slug]/ All → /projects/
H7. SECTORS WE SERVE
Education / Hospitality / Oil & Gas /
Corporate / Government
H8. WHY ELV HUB
Certifications + partnerships (short)
H9. FINAL CTA BAND
Contact Us / Call / WhatsApp

Option B — Proof first

Hero → **Projects / References** → Trusted by → Solutions icons → Solutions depth → How we work → Sectors → Why us → CTA

Use if client wants landmark projects before explaining offerings.

Option C — Solutions only, then trust

Hero → Solutions icons → Solutions depth → Trusted by → How we work → Projects → Sectors → Why us → CTA

Closest to current elv-hub.com emphasis on “what we do” first.

Client decision needed

Choose Option A, B, or C for homepage section order. Inventory of sections stays the same; only sequence changes.

5. Full site map / hierarchy (all pages)

Proposed page inventory. Pages marked ★ are primary navigation destinations. Pages marked ○ are reachable from hubs / CTAs but not necessarily in the top nav.

```
ELV HUB SITE MAP
|
|-- ★ Home ......................... /
|
|-- ★ Solutions (hub) ............... /solutions/
|     |-- ○ Audiovisual ............. /solutions/audiovisual/
|     |-- ○ IT / ELV ................ /solutions/it-elv/
|     |-- ○ Video Conferencing ...... /solutions/video-conferencing/
|     |-- ○ Energy Saving ........... /solutions/energy-saving/
|     |-- ○ Security & Surveillance . /solutions/security/   [NEW — optional]
|
|-- ★ Projects (hub) ................ /projects/
|     |-- ○ Project detail .......... /projects/[slug]/
|
|-- ○ About ........................ /about/     (footer + soft nav; not “Home/About” legacy pai
|
|-- ★ Contact ...................... /contact/
|
|-- ○ Legal (footer only)
|     |-- Privacy .................. /privacy/
|     |-- Terms .................... /terms/
|
|-- ○ Blog / Insights ............... /insights/   [OPTIONAL — phase 2]
      |-- Article .................. /insights/[slug]/
```

PAGE	PURPOSE	PRIMARY ENTRY POINTS
Home	Orient visitor in <10 seconds; route them into Solutions, proof, or Contact	Direct URL, ads, Google brand search
Solutions hub	Overview of all solution families; gateway to detail pages	Main nav, hero secondary CTA, footer
Solution detail (×4–5)	Deep dive: applications, capability list, related projects, CTA	Icons, cards, Solutions hub, search engines
Projects hub	Credibility gallery filtered by sector / solution type	Main nav, homepage projects block
Project detail	Case story: challenge → solution → outcome → related CTA	Projects hub, homepage cards
About	Company story, certifications, partners, values — for visitors already interested	Footer, soft nav, Why us links
Contact	Single conversion page: form + phone + email + WhatsApp + map	Header CTA, all page end-bands, nav

> **Client decision needed**

> Confirm whether Security & Surveillance is a 5th public solution (it appears in the draft homepage) or stays under IT/ELV. Confirm whether Insights/Blog is Phase 1 or Phase 2.

6. Global navigation & header options

6.1 Recommended primary navigation

Remove “Home”. Do not lead with “About Us”. Prefer visitor tasks.

PROPOSED TOP NAVIGATION

Solutions (mega or simple dropdown) · **Projects** · **About** (optional in top nav or footer-only) · **Contact Us** (button-style CTA)

Search: removed. Phone/email/location utility bar: optional (see 6.3).

NAV ITEM	LEADS TO	NOTES
Logo	/	Only “home” affordance needed
Solutions	/solutions/ + dropdown to each solution page	Primary discovery path
Projects	/projects/	Credibility path
About	/about/	Can live in footer only if client wants leaner nav
Contact Us	/contact/	Replaces “Request a Quote” as the single primary header action

6.2 Header behaviour (AVI-SPL inspired)

Recommended

Transparent over homepage hero → on scroll, solid/blurred bar. Inner pages: solid from load (no hero video). Nav labels sized to use available width after search removal. Slim height — no oversized white bar.

6.3 Top utility bar (phone / email / location)

Option U1 — Remove (recommended default)

Cleaner, modern. Contact details live in Contact Us, footer, and WhatsApp float. Matches client preference for non-legacy feel.

Option U2 — Keep slim utility bar

Helps older visitors find a phone number immediately without scrolling. Client said this remains undecided — keep as toggleable option.

7. Homepage section wireframes

Blocks below follow **Option A** order. Each block states: what it is, why it exists, and where CTAs go. No visual styling implied.

GLOBAL — HEADER (ALL PAGES)	
HDR	**Elements:** Logo · Solutions · Projects · [About] · Contact Us button · [optional utility bar] · [optional WhatsApp icon] **Purpose:** Persistent wayfinding + one clear conversion action. ***CTAs:*** *Logo → / · Solutions → /solutions/ · Projects → /projects/ · About → /about/ · Contact Us → /contact/*

H1 — HERO	
H1	**Elements:** Full-bleed media (compressed control-room / high-tech video or still) · Brand presence · One headline that states what ELV Hub does · One short supporting line · One primary CTA · Optional secondary CTA **Purpose:** In one glance, visitor knows: Audiovisual + IT/ELV + Security · Design, supply, install · UAE / Middle East. Matches the clarity of the current elv-hub.com opening statement. ***CTAs:*** *Primary "Contact Us" → /contact/ · Secondary "Explore Solutions" → #solutions-overview or /solutions/*

H2 — TRUSTED BY / CLIENT & PARTNER LOGOS	
H2	**Elements:** Short label ("Trusted by") · Logo strip (clients and/or manufacturer partners — client to choose mix) **Purpose:** Instant credibility (SMERK pattern). No long text. First impression after hero. ***CTAs:*** *Optional: logos link to related project or stay non-clickable. "View projects" → /projects/*

H3 — SOLUTIONS OVERVIEW (ICONS)	
H3	**Elements:** Section title · 4–5 icons with short labels only (AV · IT/ELV · Video Conferencing · Energy Saving · [Security]) **Purpose:** Fast mental model of offerings — the "old site icons" lesson. Less text, faster recognition even for non-technical visitors. ***CTAs:*** *Each icon → matching /solutions/[slug]/*

H4 — SOLUTIONS IN DEPTH (IMAGE ROWS / CARDS)	
H4	**Elements:** For each solution: image · title · 1–2 line description · “Read more” **Purpose:** After the overview, give a slightly deeper picture without dumping full capability lists on the homepage. Detail lives on solution pages. ***CTAs:*** *Read more → /solutions/[slug]/ Section end link “All solutions” → /solutions/*

H5 — HOW WE WORK (4 STEPS)	
H5	**Elements:** 1 Consultancy & Design · 2 Project Management · 3 Implementation · 4 Annual Maintenance / Support **Purpose:** Show end-to-end accountability (AVI-SPL Design/Build/Manage pattern, adapted to ELV Hub’s service list). Builds trust before project stories. ***CTAs:*** *Optional “Talk to a specialist” → /contact/*

H6 — SELECTED PROJECTS	
H6	**Elements:** 3–5 featured projects (image, name, sector tag, one-line outcome) **Purpose:** Proof. Landmark names (e.g. MBRSC, Huawei, Wego, Habtoor) do the selling. ***CTAs:*** *Project card → /projects/[slug]/ “View all projects” → /projects/*

H7 — SECTORS WE SERVE	
H7	**Elements:** Education · Hospitality · Oil & Gas · Corporate · Government (icons or simple labels) **Purpose:** Help visitor self-identify. Optional later: each sector links to filtered projects. ***CTAs:*** *Sector → /projects/?sector=… (if filters exist) or stay informational in Phase 1*

H8 — WHY ELV HUB (SHORT)	
H8	**Elements:** 3–4 points max (certifications BICSI / AVIXA / USGBC · manufacturer partnerships · end-to-end delivery · UAE track record) **Purpose:** Reinforce trust without turning homepage into an About page. ***CTAs:*** *“About the company” → /about/*

H9 — FINAL CTA BAND	
H9	**Elements:** Short invitation · Contact Us · Phone · WhatsApp **Purpose:** Capture the inquiry after the journey is complete. ***CTAs:*** *Contact Us → /contact/ · tel: link · WhatsApp deep link*

GLOBAL — FOOTER (ALL PAGES)	
FTR	**Elements:** Logo · short positioning line · Solutions links · Projects · About · Contact · Address · Phone · Email · Social · Legal **Purpose:** Secondary navigation + contact details always available. ***CTAs:*** *Same destinations as nav; email mailto:; phone tel:*

Removed from homepage vs current draft (recommended): large FAQ block (move to Contact or Phase 2), heavy “stats counters” unless real numbers are confirmed, duplicate contact forms (keep one primary form on Contact page; homepage can deep-link).

8. Inner page wireframes

8.1 Solutions hub — /solutions/

SOLUTIONS HUB SECTIONS	
S1	**Page hero (static)** — Title + one line: integrated AV / IT / Security partner. *CTA → Contact*
S2	**Solution index** — All solution families as large entries (image + title + short line + Explore). Purpose: let visitor choose a path quickly. *Each → /solutions/[slug]/*
S3	**How we deliver** — Short reminder of Design → Install → Maintain (optional if already strong on home).
S4	**End CTA** — Contact band. *→ /contact/*

8.2 Solution detail page — template for each solution

Applies to: Audiovisual · IT/ELV · Video Conferencing · Energy Saving · [Security if approved]

SOLUTION DETAIL TEMPLATE	
D1	**Hero** — Solution name + one clarifying sentence + primary CTA (Contact) + secondary (Related projects).
D2	**What this covers** — Bullet capability groups (from current site lists, refined later in content phase). Keep scannable.
D3	**Typical spaces / applications** — e.g. boardrooms, auditoriums, command centres (for AV).
D4	**Related projects** — 2–3 cards filtered to this solution. *→ project detail · → /projects/*
D5	**Partners for this solution** — Manufacturer logos relevant to this category (optional).
D6	**End CTA** — “Discuss this solution” → /contact/?topic=[solution]

8.3 Projects hub — /projects/

PROJECTS HUB	
P1	**Hero** — Title + short proof statement.
P2	**Filters** — Sector and/or Solution type (simple chips). Phase 1 can be static grouping if filters are heavy.
P3	**Project grid** — Image, name, sector, one line. *Card → /projects/[slug]/*
P4	**End CTA** → /contact/

8.4 Project detail — /projects/[slug]/

PROJECT DETAIL	
PD1	**Hero** — Project name, client, sector tags, key image.
PD2	**Challenge → Solution → Outcome** — Structured story blocks (content later).
PD3	**Systems delivered** — Tags linking back to solution pages.
PD4	**Gallery** — Additional images.
PD5	**Related projects** + **CTA** → /contact/

8.5 About — /about/

ABOUT	
A1	**Hero** — Company positioning (not homepage duplicate).
A2	**Story / mission** — Who ELV Hub is (since 2010, Dubai).
A3	**Certifications & memberships** — BICSI, AVIXA, USGBC, etc.
A4	**Manufacturer partnerships** — Logo grid.
A5	**Services summary** — Design, PM, Implementation, AMC (links to How we work on home or Contact).
A6	**End CTA** → /contact/

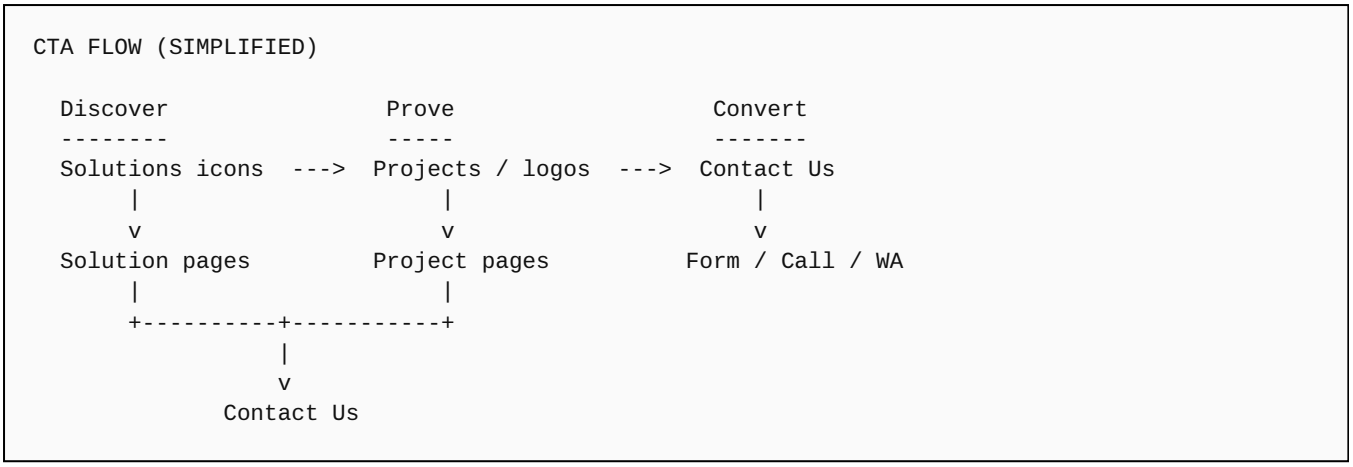

8.6 Contact — /contact/

CONTACT	
C1	**Hero** — “Let’s talk about your next project”.
C2	**Contact channels** — Phone · Email · WhatsApp · Office address (not buried in a legacy top bar).
C3	**Inquiry form** — Name, company, email, phone, solution interest, message. Optional topic prefill from URL.
C4	**Map / location** — Office location block.

9. Call-to-action (CTA) map

Every interactive action should lead to a known destination. This reduces dead ends and keeps the journey intentional.

LOCATION	CTA LABEL (WORKING)	DESTINATION
Header	Contact Us	/contact/
Header	Solutions / Projects / About	Matching pages
Header logo	—	/
Home H1	Contact Us	/contact/
Home H1	Explore Solutions	#solutions-overview or /solutions/
Home H2	View projects	/projects/
Home H3 icons	Icon click	/solutions/[slug]/
Home H4 cards	Read more	/solutions/[slug]/
Home H5	Talk to a specialist	/contact/
Home H6 cards	Project name / View	/projects/[slug]/
Home H6	View all projects	/projects/
Home H8	About the company	/about/
Home H9	Contact / Call / WhatsApp	/contact/ · tel: · wa.me
Solutions hub	Explore [solution]	/solutions/[slug]/
Solution detail	Discuss this solution	/contact/?topic=[slug]
Solution detail	Related project	/projects/[slug]/
Projects hub	Project card	/projects/[slug]/
Project detail	Related solution tag	/solutions/[slug]/
Project / About end	Contact Us	/contact/
Floating (optional)	WhatsApp	wa.me/971507363959
Footer	All nav + contact links	As listed

10. Design-system notes deferred (recorded, not decided here)

These were raised in the meeting but intentionally belong to the **visual design phase**, after structure approval:

- Reduce pure-white section backgrounds; prefer soft light-blue tones aligned with logo.
- Keep professional blue gradient treatments where they already feel strong.
- Transparent sticky header; reduce header height; enlarge nav label weight/size.
- Avoid all-caps overload in headings (content/typography rule later).
- Hero: short compressed high-tech / control-room video; replaceable mock footage OK.
- Mobile experience: same journey, stacked sections, large tap targets on Contact.

11. Open decisions checklist for client

Please mark preferences before visual design starts. No content writing required yet.

A. HOMEPAGE SECTION ORDER

☐ Option A — Hero → Trusted by → Solutions icons → Solutions depth → How we work → Projects → Sectors → Why us → CTA (recommended)

☐ Option B — Hero → Projects first → Trusted by → Solutions…

☐ Option C — Hero → Solutions first → Trusted by later…

B. NAVIGATION

☐ Approve: Solutions · Projects · About · Contact Us (no Home, no Search)

☐ Move About to footer only (leaner top nav)

☐ Utility top bar: Remove (U1) / Keep slim (U2)

C. SOLUTION INVENTORY

☐ Keep four solutions only (AV, IT/ELV, Video Conferencing, Energy Saving)

☐ Add Security & Surveillance as fifth public solution

☐ Insights / Blog: Phase 1 / Phase 2 / Not needed

D. TRUST STRIP CONTENT

☐ Client logos (MBRSC, Huawei, Wego, Habtoor, …)

☐ Manufacturer partner logos

☐ Mix of both

E. CONVERSION LABEL

☐ Contact Us (recommended)

☐ Request a Quote

☐ Book a Consultation

12. Proposed next steps after this review

1. Client returns this checklist with selections (or annotates the PDF).
2. We lock the approved hierarchy and homepage sequence.
3. We produce black-and-white layout wireframes (page compositions) matching the locked skeleton.
4. We apply brand colours / typography / motion direction.
5. Content and real media replace placeholders.
6. Development rebuilds against the approved structure (draft site is not treated as final).

STRUCTURE PHASE | **AWAITING CLIENT PRIORITIES** | **NO VISUAL MOCK-UP IN THIS FILE**

ELV Hub Middle East — Website Hierarchy & Visitor Journey · Version 1.0
